

Career Opportunities

The Club Benchmarking Software Development Team is growing again! We currently have opportunities available for a **Junior Data Analyst** and a **Mid-Level Software Developer**.

Junior Technical Analyst

Club Benchmarking is seeking to expand its software development team with the addition of a **Junior Data Analyst** to help us manage and analyze data. Club Benchmarking currently offers several SAAS products to the private club industry, with concrete plans to build many more. The candidate should be proficient in Microsoft SQL Server, ETLs and database reporting.

Candidates should also be proficient in installing software and troubleshooting network issues. Azure or AWS experience is a huge plus. The ideal candidate will be process-oriented, client-friendly, and eager to work on a growing team. This position is fully remote. Please submit your resume to careers@clubbenchmarking.com

Mid-Level Software Developer

Club Benchmarking is seeking to expand its software development team with the addition of a **Software Developer** to help us build and maintain software solutions. Club Benchmarking currently offers several SAAS products to the private club industry. Responsibilities include participation in on-going maintenance and support for existing systems, short-term internal and external projects and long-term development projects. The candidate should be proficient in the Microsoft ASP.NET web development stack, with experience of at least 2-4 years. Familiarity with older versions of ASP.NET frameworks is a plus. Azure or AWS experience is a plus. The ideal candidate will be flexible, eager to learn and engaged to work on a growing team. This position is fully remote. Please submit your resume to careers@clubbenchmarking.com
